Art of teaching

②

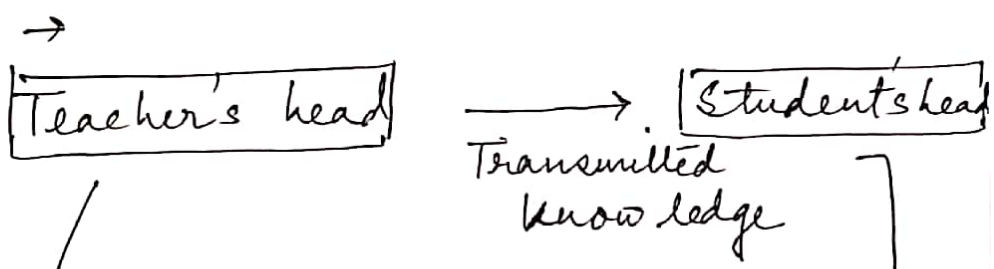

Transmission (322)

Education is a process of transmission

Transmission

Teacher-centered approach

- Dispenser of knowledge
- Arbitrator of truth
- Final evaluator of learning
- supply students with a designated body of knowledge in a predetermined order

→ Student's ability to demonstrate, replicate or retransmit this designated body of knowledge back to teacher or to some other measuring agency/entity (Through standardized test)

3) Transaction

Student-centered approach

Main philosophy

Constructivism

- process of creating situations whereby students are able to interact with the materials to be learned in order to construct knowledge.

- Not passively received, actively built up or constructed by students as they connect their past knowledge and experiences with new information.

- As each student's past knowledge and experiences are different, so too is the

↓

( interpretation  
understanding  
meaning of new information ) } each  
ultimate  
construct

not expected to pour knowledge into the heads of learners

- Teacher assist learners in their construction of knowledge by creating experiences where student's old information can transact with new information to create meaningful knowledge.

- Students may solve real world problem or to create products or performances.

④ Transformation ] • Potential to transform the learner on many different levels.

↓  
Invites both students and teachers to discover their full potential as learners

- cognitive
- emotional
- social
- intuitive
- creative
- spiritual

- To help more nurturing human being
- Transformation of consciousness that leads to a greater understanding of and care for self, others and the environment.
- Self-actualization. ~~Multiple~~ Multiple dimension of self.
- Discovering and developing each individual's unique talent and capabilities.
- Adds ~~meaning~~ meaning, consciousness and inter-connection.
